

Tork Advanced Håndklædeark Rulle

Fordel

- Effektiv sugsevne - tørrer hurtigt og grundigt
- Præget mønster
- Mange håndklæder pr. rulle - reduceret behov for genopfyldning
- Håndklæder på rulle - uinteressante at stjæle

Food contact approved certified by a third party

Produktspecifikation

Artikel	System	Rullelængde	Rullebredde	Rullediameter	Indvendig kerediameter	Lag	Tryk	Prægning	Farve
290067	H1 - Håndklæderullesystem, H1 - Håndklæderullesystem	150 m	21 cm	19 cm	3.8 cm	2	Nej	Ja	Hvid

Beskrivelse

Håndklædearkene har en god absorberingsevne og er pga. TAD teknikken samtidig stærk, selv når de er våde.

Forsendelsesdata

Forbrugerenhed

EAN	7322540138597
Stk.	1
Materiale	Banderole
Højde	210 mm
Bredde	190 mm
Længde	190 mm
Volumen	7.6 dm ³
Nettovægt	1307 g
Bruttovægt	1335 g

Palle

EAN	7322540138603
Stk.	168
Forbrugerenheder	168
Højde	1879 mm
Bredde	800 mm
Længde	1200 mm
Volumen	1.6 dm ³
Nettovægt	219.58 kg
Bruttovægt	240.44 kg

Transportenhed

EAN	7322540138719
Stk.	6
Forbrugerenheder	6
Materiale	Carton
Højde	247 mm
Bredde	388 mm
Længde	588 mm
Volumen	56.4 dm ³
Nettovægt	7.84 kg
Bruttovægt	8.59 kg

Miljø

Content

The fibre composition in the product is virgin and recycled

Material

Virgin fibres and recovered paper

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent Dry strength agent Dye Fixing agents Fluorescent whitening agent Glue Softeners The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid Packaging Fulfillment of Packaging and Packaging Waste Directive (94/62/EC): Yes Environmental label Ecolabel This product does not have an ecolabel

Date of issue 2006-06-12

Revision date 2010-03-12

Production This product is produced at Kostheim mill, Germany. Kostheim mill is certified according to ISO 14001 and EMAS.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste. The packaging can be used for material recovery or energy recovery
